New WEATHER GUARD® Transfer Tank Covers Get the Look of Aluminum with the Strength of Steel

CRYSTAL LAKE, ILL. – August 2008 – New aluminum tread WEATHER GUARD® transfer tank covers are now available from Knaack LLC. The new transfer tank covers allow users to match their steel transfer tanks with their existing aluminum tread truck storage equipment.

Each of the new five transfer tank covers (Model Nos. 351, 353, 359, 361 and 362) corresponds to one of the five available WEATHER GUARD transfer tank models (Model Nos. 350, 352, 354, 358 and 360). The covers are made of heavy-gauge aluminum for years of durability and manufactured to exacting standards to fit precisely.

Requiring no special tools or hardware, the new transfer tank cover is easy to install by simply slipping the cover onto the tank.

“These new transfer tank covers were developed to meet users’ demand for a product that would allow them to achieve uniform-looking and aesthetically pleasing truck storage,” said Mike Sover, senior product manager, Knaack.

Available tank models have a 50, 75, 90, 100 and 110 gallon capacity to transport diesel fuel only. Constructed of 14-gauge steel, WEATHER GUARD transfer tanks have a Brite White powder coat finish and a 2-inch I.D. filler neck that is threaded to accept standard 2-inch threaded pipe.

Knaack LLC makes and markets a complete line of WEATHER GUARD Truck Equipment, including a variety of pickup truck storage boxes and racks, hi-side boxes, underbed boxes and more, all with a superior fit and finish that keeps the contents secure and the vehicle looking good. It also makes and markets WEATHER GUARD Van Solutions and KNAACK Jobsite Storage Equipment. Learn more at www.weatherguard.com/truck.
